Soucoupes pour plaques thermoformées	p 123-124
Plaque de dépôtage et appareil extracteur de plaques.....	p 125

❑ PRESENTATION

❖ Matières : Polystyrène épais.

❖ Les plaques « QP » sont des plaques rigides, réutilisables

❖ Les plaques « HP » sont des plaques légères

❖ Avantage :

➤ Pour faciliter le dépotage, toutes les plaques sont munies de grands trous réguliers dans le fond de la plaque.

➤ Les grands trous et pointes dans le fond des plaques optimisent le drainage et l'aération.

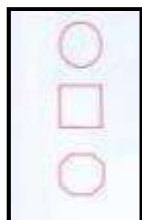

➤ La solidité des plaques garantit un remplissage, un semis et un dépotage des plantes enracinées efficace.

➤ Les pointes stables dans les plaques garantissent un dépilage facile (à la main ou à la machine). Même après plusieurs années d'utilisation.

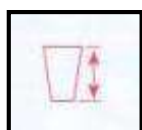

➤ Grâce à sa surface lisse, la plaque se nettoie très facilement.

➤ Toutes ces plaques sont recyclables.

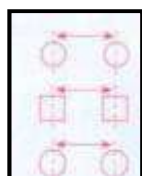

INDEX

Forme du pot

Profondeur du pot

Distance entre les pots,
centre à centre

Dimension de la plaque

Nombre de plants par m²

Nombre de plaques par carton

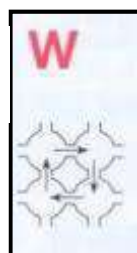

Plaque de dépotage disponible

Très profond, plaque pour arbre

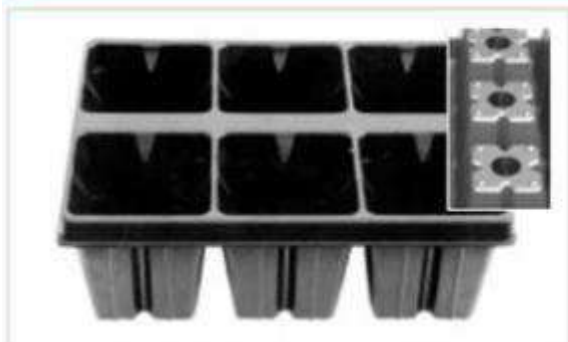

Pot rond

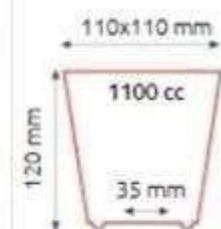

Tous les produits ayant ce
code « W » sont
disponibles avec rainures
pour la distribution de
l'eau.
